

The **non-standard** compliant “Romanian (Legacy)” keyboard layout included in the Microsoft Windows Vista operating system (or later versions):

These are the accented characters that can be obtained with this keyboard layout using the dead keys in Windows Vista (or later versions; this also works in Windows 9x/ME, there with the “Romanian” named keyboard layout):

	AltGr + key:											
	1	2	3	4	5	6	7	8	9	0	-	=
[space]		˘	ˆ	˘	˚	˘		˙	˘	˝	˝	˘
A			â, Â	ă, Ă		ą, Ą			á, Á		ä, Ä	
B												
C		č, Č							ć, Ć			ç, Ç
D		ď, Ď										
E		ě, Ě				ę, Ę			é, É		ë, Ë	
F												
G												
H												
I			î, Î						í, Í			
J												
K												
L		ł, Ł							ĺ, Ĺ			
M												
N		ň, Ň							ń, Ń			
O			ô, Ô						ó, Ó	ő, Ő	ö, Ö	
P												
Q												
R		ř, Ř							ŕ, Ť			
S		š, Š							ś, Ś			ș, Ș
T		ť, Ť										ț, Ț
U					ů, Ů				ú, Ú	ű, Ű	ü, Ü	
V												
W												
X												
Y									ý, Ý			
Z		ž, Ž						ż, Ż	ź, Ź			

Note: there is a difference between Windows Vista version and Windows 9x/ME version, regarding the AltGr+8 dead key and Space combination:

- on Windows Vista, the AltGr+8+Space combination will generate ˙ (Middle Dot; Unicode 00B7)
- on Windows 9x/ME, the AltGr+8+Space combination will generate ˘ (Dot Above; Unicode 02D9)
